

Efegi Areye Edisemi

FRONTEND ENGINEER – Bayelsa, Nigeria

Tel: [\(+234\) 905-9769-092](tel:+2349059769092)

Email: edisemiefegi@gmail.com

LinkedIn: www.linkedin.com/in/efegi-edisemi

Accomplished Frontend Engineer with extensive experience in developing sophisticated technology solutions. Adept in full project lifecycle management from planning to deployment, and skilled in translating complex requirements into user-friendly applications. Demonstrated leadership in both team settings and individual projects.

SKILLS

HTML, CSS, JAVASCRIPT, TYPESCRIPT, VUE, NUXTJS, REACT, FIGMA

EXPERIENCE

Casely, Abuja, Federal Capital Territory, Nigeria— *Frontend Engineer*

November 2024 - Present

- Currently, I am contributing to the development and optimization of front-end components for a software solution designed for law firms, utilizing React, Tailwind, and TypeScript.
- I work closely with the team to implement responsive designs, debug code, and ensure seamless functionality across various platforms, ensuring a smooth and efficient experience for users

Ogilvista, London Area, United Kingdom— *Frontend Engineer*

September 2024 - October 2024

- I contributed to developing and optimizing front-end components using Vue.js, enhancing the user interface for advertising technology solutions.
- I collaborated with the team to implement responsive designs, debug code, and ensure seamless functionality across various platforms.

Goofer Food, Bayelsa, Nigeria— *Frontend Engineer*

October 2022 - JANUARY 2023

- Developed new components for the internal design system, improving consistency and usability across the platform.
- Collaborated with cross-functional teams to align front-end deliverables with project goals, driving scalable growth through effective implementation of design and development best practices.

Freelance Web Developer, Abuja, Nigeria —Front End Engineer

FEBRUARY 2021 - Contract

- Collaborated with a multidisciplinary team to develop a secure escrow application, enhancing trust within the Nigerian eCommerce sector, using Vue.js and Nuxt for efficient, scalable frontend architecture.
- Delivered high-impact web applications for capital raising, fundraising, and crowdfunding, leveraging Vue.js, Nuxt, and TypeScript for performance optimization and seamless user experience.
- Utilized TypeScript to ensure robust, type-safe codebases and collaborated closely with design teams using Figma to create intuitive, responsive UIs.

EDUCATION

Niger Delta University, Bayelsa, Nigeria — Bsc Computer Science
